

Kansas Special Education Attrition Report 2016-2017

Kylie Stewart, PhD

April 2018

Acknowledgements

This report is completed with the assistance of Sarah Vanderpool and Kerry Haag at the Kansas State Department of Education (KSDE) who assist in obtaining the data each year. Additionally, historical data compiled from 1983 to 2010 by Paul McNabb is critical in identifying trends in current attrition rates. This report is submitted to the Student Support Services section of KSDE and supported through a contract with the Greenbush the Southeast Kansas Education Service Center, Mike Bodensteiner, Director, and Julie Wilson, coordinator of the project. Johnna McColm of Greenbush (SEKESC) conducted the editor review.

Kansas Special Education Personnel Attrition Rates of Personnel Employed During the 2016-17 School Year Who Did Not Return for the 2017-18 School Year

This report was developed through data analysis of Kansas special education personnel employment during the 2016-17 and 2017-18 school year. The Kansas State Department of Education (KSDE) provides data to this study each year, which is collected from the school districts in Kansas that employ special education personnel. The data is used in this report to identify personnel who have left the field of special education and a specific school district, while KSDE uses this data for financial reimbursement purposes. A combination of pivot tables and formulas were conducted in Microsoft Excel, and compared to previous years reports, to examine trends in special education personnel attrition. All personnel numbers reported represent a headcount of personnel rather than an FTE count. Below is a summary of select findings followed by detailed tables in each evaluated area.

Selected Findings

Table 1

Table 1 identifies the attrition rates for all certified special education personnel for each school year from 1976-77 through 2016-17. At the beginning of the 2016-17 school year, 1,275 of the 9,156 personnel employed during the 2017-18 school year did not return to a special education position in Kansas. This represented an attrition rate of 13.9%, higher than the previous year of 13.5%. This continues to be higher than the 12.8% national average for teacher attrition, which has not historically been the case in Kansas until 2014.

Table 2

Table 2 identifies the attrition rates for the 2017-18 school year for the 36 different categories of special education personnel. Categories containing less than 50 personnel employed should be considered cautiously due to the low sample size, which would allow for broad fluctuations in the attrition rates when small personnel changes occur. The largest teaching categories had the following attrition rates:

- Mental Retardation, 16.5%
- Early Childhood, 12.2%
- Behavior Disorder, 20.3%
- Interrelated, 16.2%
- Learning Disability, 11.6%
- Gifted, 14.1%

The largest related services categories had the following attrition rates:

- Nurses, 16.8%
- Social Worker, 11.1%
- Occupational Therapy, 11.4%

- Speech/Language, 10.9%
- School Psychologist, 10.1%

Long-term trends in these individual categories can be examined in Tables 11 to 16.

Tables 3 and 4

Tables 3 and 4 represent two overarching categories of teaching personnel vs. related service personnel. Teaching personnel had an overall attrition rate of 15.3% in 2017-18, which represented a continued increase in attrition and resulting in attrition higher than the national average for the first time. There were a number of categories with attrition changes worth noting. Interrelated experienced an attrition rate higher than the national average at 16.2% for the fourth year in a row, which was an increase from 9% in 2012-13. Teachers under the category Mental Retardation had a significant increase from 11% in 2014-15 to 16.5% in 2017-18. Additionally, the category Behavior Disorder experienced a significant increase, as well, from 13.8% attrition in 2016-17 to 20.3% in 2017-18.

Related services experienced a slight decrease in total personnel from 3,715 in 2016-17 to 3,584 in 2017-18. This resulted in a decrease in the attrition rate from 13.4% in 2016-17 to 11.7% in 2017-18. For the first time in four years, Speech/Language experienced a decrease in attrition from 13.9% in 2016-17 to 10.9% in 2017-18. Additionally, School Psychologists returned to their typical attrition rate of 10.1% in 2017-18 after a significant increase to 15.1% in 2016-17.

Table 5

Table 5 displays a historical summary of personnel attrition by category from 1976-77 to 2017-18. Categories not currently represented at the state level were removed from the report. Those categories include but not limited to: Educable MR, Trainable MR, Interrelated LD/EMR, Interrelated LD/EMR/BD. From 1976-77 to present day, school districts have employed 230,533 in the remaining categories and experienced an attrition rate of 10.7% below the national average of 12.8%.

Table 6

Table 6 examines the difference in attrition rates for school districts by size. Large districts are defined as those who employ 100 or more personnel, medium districts employ between 11 to 99 personnel, and small districts are those who employ fewer than 11 people in special education positions. The term 'district' in this table is a broad term referring to school districts, cooperatives, inter-locals, and other types of administrative arrangements. Large districts experienced a slight increase in attrition from 13.6% to 13.9%. Medium districts continued to experience no change in attrition rates at 13.7% attrition which has been a consistent trend over the last three years. Finally, small districts experienced a significant increase in attrition from 9.4% to 21.2%.

Table 7

Table 7 identifies the difference in attrition rates from rural and urban districts. An urban district is located in one of the following counties: Johnson, Sedgwick, Shawnee, and Wyandotte. Twenty-five districts were identified as urban, and eighty-three districts were identified as rural. There was a slight increase in attrition rates for rural districts with 13% to 13.8% respectively. Urban districts experienced relatively little change in attrition rates from 14.2% to 14.1%.

Table 8

Table 8 examines the attrition rates of school districts by the type of administrative plan they are operating under. Cooperatives continued to experience an increase in attrition that began in 2012-13 with 9.5% attrition to 15.0% attrition in 2017-18. Additionally, school districts experienced an increase from 13.4 % to 14.1% in 2017-18. The administrative plans described as other had a significant increase from 13.8% in 2016-17 to 17.0% in 2017-18.

Table 9

Table 9 identifies the attrition rates by geographical region. These regions and a corresponding map can be examined in Appendix 2 of this report. The attrition rates in the region ranged from a high of 16.2% in the Northeast region to a low of 11.9% in the Southeast. The Northeast region experienced the most significant change in an increase from 13.1% to 16.2% attrition rate in 2017-18. Wyandotte and Johnson Counties continued to have an attrition rate higher than the national average with 14.6% in 2017-18.

Table 10

Table 10 examines the attrition rates by grade level assignment. Data reported by school districts contained both the lowest grade level and the highest-grade level personnel were responsible for. This data was combined to place personnel in a category of preschool, elementary, middle, secondary, or all. Middle level personnel experienced the highest decrease from 11.6% to 17.9%. Secondary continued to increase from 12.2% in 2016 to 14.1% in 2017 to 17.2% in 2018. Preschool, all, and elementary attrition remained mostly unchanged.

Table 11, 12, 13, 14, 15, and 16

Tables 11 thru 16 summarized the annual attrition data for 17 of the most employed personnel categories. These tables allow for a unique perspective on the philosophical changes in how services are provided by examining changes in particular positions. There was a significant increase in attrition rate in the areas of behavior disabilities from 14.0% to 20.3% the largest attrition rate since 1978. Special education administrators met a historical high of 16.3% attrition in 2015-16, but returned to a more consistent attrition rate in 2016-17 at 7.2%.

Tables 17, 18, 19, and 20

Tables 17 thru 20 report attrition rates for individual school districts rather than individual personnel. Districts employing less than 12 personnel have been removed due to the lack of

sufficient sample size. The attrition rate ranges from 29.6% to 0%. Five years of data has now been compiled on school districts to be able to identify trends in districts where attrition is historically low.

Summary

The purpose of this report is to analyze exit attrition in the state of Kansas. Exit attrition is a significant issue for schools and requires yearly examination to identify trends and patterns to attrition in the state either in areas of specific categories, types of administrative plans, areas of the state, and sizes of the school districts. The report for 2017-18 continues to find that a trend in increased attrition rates is continuing in Kansas and continuing to be higher than the national average. Additionally, hard to fill positions such as behavior disorders and mental retardation categories continue to be exponentially higher than other positions. If you take into account current waivers (382 teachers) and open positions (80) in special education across the state, we begin to see a significant need for both qualified special education teachers and retention programs to begin to reduce the high rate of teachers leaving the field.

Table 1**Special Education Annual Attrition Rates for 1976-77 Through 2016-17**
